## ABOUT ME

---

I consider myself a simple, eccentric and outgoing person, I like to deal with matters straight to the point and I love to talk. I am passionate about games of all kinds, such as digital games, board games and roleplay games. I love to watch movies, series and animes. I have a very eclectic musical taste, but if I were to choose a favorite singer or band I would choose Jack Johnson. I appreciate nature in all its dispositions, from the starry sky at night, the waves of the sea on the beach, the clouds on a mountain peak. The hiking and camping experiences I had were unique and sensational, and I would do it again without a second thought. As for sports, I don't participate often, but I like swimming, volleyball and tennis, and I want to try skiing. I have a joy in experiencing new cultures, and as I've lived in only two different countries so far, I do want to try experience living in other countries, aiming to explore the diversity that different cultures can give me around the world.

## WORK EXPERIENCE

---

🏢 **KITO Health** – Lisbon (Remote), Portugal

### IT Team Leader

[ 01/06/2022 – Current ]

As Kito Health's IT team leader, I have responsibilities such as code development and maintenance, sprint creation and management, relationship and communication between the team and other departments, detailed feedback reporting, planning and execution of changes at the team management level, development of the timeline with all foreseen future tasks, changes in products already developed and management of tasks that appear in demand during the course of planning. There is also the responsibility of guaranteeing a good level of security for the software developed, a good functioning of the infrastructure in the cloud and an excellent quality of the maintainability of the codes, in order to guarantee the proper functioning of the project at the end of its development, and the possibility of maintaining its proper functioning at a low cost.

For other kind of tasks that is not IT related, I do:

Supply information related to the IT department to any other department or collaborator of the company when needed, often doing tasks that manage the content with some filters and formattations before sending it.

Lead weekly meeting with the IT team, helping avoid future impedments on the ongoing tasks, also helping with reviews and improvement suggestions to the tasks done, delivering it individually to each member.

Get feedbacks for improvements of the sprint, team methodology, ongoing tasks or other technologies that might be more performatic to use.

Currently I've achieved to plan, execute and deploy three different products, being an API, front-end only mobile-first application and front-end only for desktop, with the development of different versions of some of those products for specific situations. Also created a methodology that made the development routine of the IT Department grow bigger, quicker and more robust than before.

Languages and tecnologies: Javascript, Typescript, Node, React, HTML, CSS, AWS, Insomnia, Postman, Github, Git, Trello, Asana, Slack, Figma, MongoDB Atlas, MongoDB CLI, Google Analytics, Hotjar, Dotenv, JWT, Mongoose, MVC, PWA, Google Spreadsheet.

🏢 **KITO Health** – Lisbon, Portugal

### Software Engineer

[ 23/05/2021 – 31/05/2022 ]

Responsible for the entire software life-cycle: Brainstorming, Idealization, Architecture, Management, Development, Debbug and Optimization.

In a daily basis I'm responsible to be the bridge between every other department with the TI, creating solutions and discussing with others leaders from others departments and passing each usefull information and changes to the TI departments. Also doing development and software management tasks for the applications.

 **HUMANIZEIT LDA** – (Remote), Portugal

## IT Manager and Programmer

[ 13/05/2020 – Current ]

I was hired to this startup's as a developer of web applications and other programs, first setting some standards for future developments using Trello, Slack, Discord, Git and AWS. The first project was a product of its own, which was the creation of a responsive website using JavaScript, HTML5, CSS, ReactJS and Material-UI.

Subsequently, tasks from diverse areas of performance were done, such as the creation and development of business projects for factories, attracting potential suppliers, researching inputs, direct contact with new customers and third parties (such as carriers and other technology companies) and the creation of a action plan, costs, deadlines and technologies to be used for a gamified education mobile application.

Afterwards, an e-commerce was created using WooCommerce and PrestaShop, later being migrated to the creation of our own e-commerce using PHP, Laravel, MySQL, Composer and OctoberCMS.

 **PROTECH SOLUTIONS** – Aracaju, Brazil

## Software Developer

[ 17/02/2019 – 18/06/2019 ]

Work was carried out to create new features, bugfix and unit tests of software from a large bank in the region, including front-end and back-end programming and dealing directly with the project's APIs. Kanban and Scrum agile methodology was used together for the development of biweekly sprints.

The technologies used were: C #, Javascript, HTML5, CSS, Microsoft Visual Studio, ASP.NET, MVC, Postman, Insomnia, Slack, Trello, Git, MySQL, JSON, REST, Unit Test, Agile Methodologies, Scrum and Kanban.

 **Universo de Estudos** – Aracaju, Brazil

## Director of Technology and Direction

[ 31/07/2015 – 23/09/2017 ]

I was hired to make recordings and editions of the studio's videos and also to research and use recent technologies for audios, videos and the creation of the blog and website of the company.

Together, good communication and business organization were acquired by dealing directly and daily with professors, clients, entrepreneurs and university students.

The technologies used were: HTML5, CSS, WordPress, Adobe Premier and Vimeo.

 **Sergipe Tech** – Aracaju, Brazil

## Software Developer C#

[ 10/07/2018 – 26/08/2018 ]

- Coding of computer programs;
- Compilation of programming languages, aiming to check and adjust the program's syntax;
- Conducting tests on the source code;
- Modification of programs, changing the processing, coding and other elements, aiming correct failures and / or meet changes in systems and new needs;
- Improvement of technical knowledge, through research, study of manuals, aiming at also the optimization of the use of the resources available in the company;
- Conducting simulations and creating production environments in order to measure the results of Software;
- Creation of complementary documentation, such as "helps", operating or adjustment instructions of consistency.

## PROJECTS

---

[ 11/2020 ]

**7 Seconds** This project was carried out in group but with individual production of the website during the subject of Multimedia Laboratory of the Master in Multimedia at the University of Porto in the year 2020.

A responsive website was created for its publication, available through github pages at: <https://rraffael.github.io/MM-7-Seconds/>

The technologies used for this project were: HTML5, CSS, Javascript, ReactJS, Material-UI and Github.

Link: <https://github.com/rraffael/MM-7-Seconds>

[ 11/2020 ]

**Through My Eyes** This project was carried out in group but with individual production of the website during the subject of Multimedia Laboratory of the Master in Multimedia at the University of Porto in the year 2020.

A responsive website was created for the publication of this project, available on github pages at: <https://rraffael.github.io/MM-Through-My-Eyes/>

The technologies used for this project were: HTML5, CSS, Javascript, ReactJS, Material-UI and Github.

Link: <https://github.com/rraffael/MM-Through-My-Eyes>

[ 09/2020 ]

**Transmedia Storytelling -Tales of Arcadia Case Study** A study was carried out on the transmedia of arcadian tales during the course of "Multimedia Seminar" in MM / UPorto, in which the work's bible with history, characters, platforms, communications (advertising and increment of story).

[ 11/2020 ]

**Transmedia - The Various Faces of Hercules** Project to create a transmedia work of the 12 works of hercules, carried out in the chair of "Seminário Multimédia" in MM / UPorto, in which the construction of a transmedia bible was carried out involving the development of a story, characters, world, plot and dramas .

[ 2018 ]

**Evasion Predict** This project was done during the graduation of Systems for Internet as work of conclusion of course, at Universidade Tiradentes. The idea for this project comes from studies previously carried out on the dropout of students in higher education in computing.

The main objective of the project was to create an application that identifies the evasion rates of a class by identifying the individual evasion of each student in it, before the same occurs, thus enabling the attempt to prevent the evasion of a particular student or of a particular class, according to the possibilities provided for in the application.

As secondary objectives, it would be the viability of such an application as an API and the prediction accuracy rate above 80%.

The technologies used for this project were: Python, Pandas, Numpy, Scikit-learn, Flask, REST and JSON

Link: <https://github.com/rraffael/EvasionPredict>

[ 2018 ]

**Web Chat Bot** This project was carried out during the course of Project Labs 1, at Universidade Tiradentes, during the course on Internet Systems.

In order to bring recent content to students and try to perform a simulation of interactivity between different groups in the same project, my group was responsible for implementing the connection between a chatbot that used the api watson and the other groups in their needs.

The technologies used for this project were: IBM Watson, ASP.NET Core, Microsoft Visual Studio and MVC.

Link: <https://github.com/rraffael/WebChatBot>

## EDUCATION AND TRAINING

---

### Master in Multimedia (Interrupted)

*Faculdade de Engenharia da Universidade do Porto* [ 08/2019 – 31/12/2021 ]

Country: Portugal | Website: [https://sigarra.up.pt/feup/pt/web\\_page\\_inicial](https://sigarra.up.pt/feup/pt/web_page_inicial) | Level in EQF: EQF level 7

## Graduation in Internet Systems

**Universidade Tiradentes** [ 31/12/2016 – 17/07/2019 ]

City: Aracaju | Country: Brazil | Website: <https://www.unit.br/> | Level in EQF: EQF level 6

## Graduation in Computer Science - Incomplete

**Universidade Tiradentes** [ 2014 – 2017 ]

Website: <https://www.unit.br/> | Level in EQF: EQF level 6

## LANGUAGE SKILLS

---

**Mother tongue(s):** Portuguese

**Other language(s):**

**Inglês**

**LISTENING C1 READING C1 WRITING C1**

**SPOKEN PRODUCTION C1 SPOKEN INTERACTION C1**

**Espanhol**

**LISTENING A2 READING A2 WRITING A1**

**SPOKEN PRODUCTION A1 SPOKEN INTERACTION A1**

*Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user*

## HOBBIES AND INTERESTS

---

**Games, Movies, Series, Animes, D&D, Music, Boardgames, TCG** I am a huge fan of all kind of games, competitive, rogue-like, indies, platforms, racing, RTS, FPS, Boardgames, TCG and the list goes on, be it computer or console.

I like to watch movies and series from all tastes, but I highlight sci-fi, medieval / mystical and anime.

I go to virtual D&D tables including versions 5e, pathfinder 2e, vampire, ravnica and others that I had the privilege of participating in a one-shot.

My musical taste is very eclectic, I listen to different types of music and singers, but my favorite is Jack Johnson.
